EDUCATION

University at Buffalo, The State University of New York Buffalo, NY
Bachelor of Science in Computer Science May 2024
Theta Tau Engineering Fraternity: Chair of Professional Development

SKILLS & CERTIFICATIONS

Languages: Python, JavaScript, Java, Scala, HTML, CSS, C, C++, Swift, ARM Assembly, Bash
Technologies/Frameworks: React, Next.js, Node.js, Git, Docker, Flask, Jira, Firebase, MongoDB, PostgreSQL
Certifications: CodePath Certificate in Software Engineering, CodePath Certificate in iOS Development

EXPERIENCE

Hyveout | *CoFounder & Software Engineer* | New York, NY August 2024 - Present

- Co-founded Hyveout, a creative agency collaborating with influencers and artists, achieving **100K+** followers
- Led technical execution, developing custom websites and interactive games with HTML, CSS, JavaScript, and jQuery to align with music artists' brands
- Streamlined workflows, ensuring on-time project delivery, enhancing client engagement and brand presence

CytoCybernetics | *Software Engineer Intern* | Buffalo, NY June 2023 - August 2023

- Enhanced electrophysiology software using C, C++, and GTK API, resolving critical functionality issues that improved reliability for researchers
- Refactored **30%** of the codebase, reducing redundancy and improving runtime efficiency, which decreased execution time by **20%**
- Expanded Turbo Mode feature by integrating Hodgkin-Huxley and Markov models, enabling simulations to run **25%** faster for ion channel analysis

GymRat LLC | *Software Engineer Intern* | Remote January 2023 - May 2023

- Optimized GymRat+ app usability by resolving bugs and integrating user-centric features using React Native, Express.js, and PostgreSQL reducing errors by **60%**
- Conducted usability tests and incorporated feedback, increasing user satisfaction scores by **70%** and improving retention metrics
- Improved code quality and team productivity through daily Agile stand-ups and pair programming

PROJECTS

MyLyfe | *Software Engineer* | (Team of 5)

- Built a web app in React and Swagger API to help users achieve personal goals and foster a supportive community, empowering **100+** users during beta testing
- Implemented a point-based engagement system, allowing users to set goals, track progress, and interact with peers, improving user retention by **35%**
- Secured **Top 5** out of **500+** participants, recognized for innovative design and positive user impact

Full-Stack Web App | *Software Engineer*

- Designed and implemented a full-stack application in Python, focusing on secure and scalable TCP server-side functionality using HTTP, APIs, and web sockets
- Secured user data with encrypted authentication protocols, achieving **100%** success in penetration tests
- Optimized database operations with MongoDB and Docker containers, improving query efficiency by **50%** through Test-Driven Development

LEADERSHIP EXPERIENCE

University at Buffalo | *Project Manager Intern* | Buffalo, NY August 2023 - December 2023

- Directed the development of an educational app**,** optimizing team efficiency by **40%** through **Agile** Methodology and Jira
- Delivered **100%** client alignment using detailed Figma prototypes
