EDUCATION

University at Buffalo, The State University of New York Buffalo, NY
Bachelor of Science in Computer Science May 2024
Theta Tau Engineering Fraternity: Chair of Professional Development

SKILLS & CERTIFICATIONS

Languages: JavaScript, TypeScript, Python, HTML, CSS, C, SQL
Frameworks & Tools: React, Next.js, Node.js, Tailwind CSS, Jira, Git, Figma
Databases & Backend: PostgreSQL, MongoDB, Supabase, Firebase, REST APIs
Technologies: Stripe, Webhooks, Row-Level Security (RLS)
Certifications: CodePath-Software Engineering Certificate, iOS Development Certificate

EXPERIENCE

T.M. Bier & Associates | *Control Systems Software Engineer* | New York, NY February 2025 - Present

- Debug production defects across application and network layers, tracing root causes through control logic and BACnet/IP, MS/TP, and Niagara systems
- Design and deploy control software from scratch, defining requirements, input/output, edge cases, and testing before production release
- Build JavaScript front ends integrated with live control systems for real-time equipment monitoring and control
- Translate client requirements into technical designs and implementations for major control-system rewrites across multiple commercial sites

Hyveout | *Co-Founder & Software Engineer* | New York, NY August 2024 - Present

- Co-founded a music-tech brand and serve as sole engineer, building interactive games and web experiences with **100K+ game plays** and **5M+ music video views**
- Grew Hyveout from independent-artist collaborations to inbound opportunities from record labels and entertainment companies, building a global audience across multiple markets
- Migrated front ends from vanilla JavaScript to React, Next.js, and TypeScript, improving performance, SEO, and maintainability
- Improved load times through asset optimization, lazy loading, and deferred loading of heavy media
- Own the full software delivery lifecycle: requirements, planning, implementation, user testing, iteration, and deployment

CytoCybernetics | *Software Engineer Intern* | Buffalo, NY June 2023 - August 2023

- Refactored a large C/C++ simulation codebase and implemented new features using Hodgkin-Huxley and Markov models to improve maintainability and simulation efficiency

PROJECTS

A Witch's Whisk | *Software Engineer* July 2025 - Present

- Built a full-stack e-commerce platform (Next.js, TypeScript, Tailwind CSS, PostgreSQL), replacing a manual DM-based ordering process
- Designed a relational database schema with row-level security (RLS) to enforce secure, user-specific data access
- Developed server-side APIs and checkout flows to keep client state consistent with the backend
- Integrated Stripe Checkout and webhook order processing with idempotent workflows for reliable transactions
- Built an admin dashboard enabling a non-technical owner to manage inventory and orders independently
- Generated **$20,000+ in revenue within 12 months** by streamlining the purchasing process and improving order accessibility
